TECHNICAL SKILLS

Languages

Python, Java, JavaScript, Dart

Backend

Python Flask, RESTful APIs

Database

PostgreSQL, SQL Server, MongoDB

Frontend

ReactJS, HTML, CSS

Tools

Git, GitHub, Postman, VS Code

SOFT SKILLS

- Problem solving
- Teamwork
- Self-learning
- Communication
- Time management

EDUCATION

HCM University of Natural Resources and Environment

Software Engineering
2022 - 2026

ĐẶNG VĂN KHOA

SOFTWARE DEVELOPER INTERN

PROFILE

Software Engineering student with hands-on experience developing full-stack applications, backend services, and recommendation systems using Python Flask, ReactJS, RESTful APIs, and PostgreSQL. Familiar with database design, API integration, JWT authentication, data processing, and responsive interfaces. Seeking a Software Developer Intern position to contribute across backend, frontend, and AI-focused projects.

FEATURED PROJECTS

AI Laptop Recommendation System 2025

Full-stack Developer | Flask, ReactJS, PostgreSQL

- Built a laptop recommendation system using Analytic Hierarchy Process and criteria-based scoring.
- Implemented APIs for criteria scoring, user preferences, and personalized recommendations.
- Created recommendation logic using CPU, RAM, GPU, storage, price, and user needs.

Demo: analytic-hierarchy-process-one.vercel.app

SPA Management System 2026

Full-stack Developer | Flask, JavaScript, PostgreSQL

- Developed a SPA management system for customer management, appointment booking, service management, invoicing, and administration.
- Built backend APIs and processing logic for user registration, booking, real-time messaging, and invoice handling.
- Designed and managed the PostgreSQL database for customers, services, appointments, invoices, and related business data.
- Integrated frontend features with backend APIs to ensure smooth data flow between the interface and the server.

Medical Appointment Booking System (DLKB) 2026

Backend & Mobile Developer | Flask, Flutter, PostgreSQL

- Developed a multi-role medical appointment system for patients, doctors, and administrators.
- Built modular Flask REST APIs with JWT authentication, role-based authorization, booking, search, notifications, statistics, and payment routes.
- Connected a Flutter mobile application to PostgreSQL-backed services for doctor lookup, available time slots, and online appointments.

WORK EXPERIENCE

Automation Land 04/2026 - 06/2026

Software Intern

- Executed functional, UI, regression, and basic API testing from project requirements.
- Designed test cases, documented defects, verified fixes, and collaborated with developers.
